

Public Open House #2

Tuesday, October 21, 2008

Woodruff Elementary School Multipurpose Room

6:00 p.m. to 8:00 p.m.

Results Highlights

Purpose of the meeting: to provide an update on the 10th West Project; Present new information and the initial conceptual design – Gather input

I. Attendance

- The meeting was attended by 85 people from across the corridor. The majority of the attendees were from the residential area between 200 South and 800 South.

II. Comment Highlights

- 22 comment forms were submitted. The most often cited comments and most significant issues noted are as follows:
 - Significant concern for the pedestrian safety and the decreased distance between vehicles and pedestrians due the lack of a landscaping strip
 - Many requests for development of a barrier between vehicles and pedestrians
 - Strong desire for a pedestrian crossing at Three Point Ave. – underpass, overpass, etc. to meet the pedestrian needs between neighborhood areas, to / from parks, schools, church, residences, etc. Note this is not just for elementary school children
 - Strong support to retain the existing speed limits
 - Broad support to retain the signal at 600 South
 - Some support for development of an overpass/underpass at 600 South, but not at the loss of the signal
 - Increasing traffic noise is a concern – consider a sound wall
 - A general recognition that something needs to be done to improve the function of 10th West
 - Several suggestions to close off some side streets to 10th West and create alternate routes from residential areas
 - Good support to pursue alternate pedestrian routes “off 10th West”
 - General understanding that something needs to be done; some feel developing a new “western bypass” would alleviate the need to add capacity to 10th West
